## 3. CONTEXT OF THE CALL

The implementation of a circular economy in cross-border regions of Greece and Albania is still in its development phase. In line with the EU's circular economy approach, both countries have integrated these targets into their respective national strategies. Therefore, aim of this specific objective is to support the efforts of cross-border regions to achieve a more efficient use of resources, with particular emphasis on recovery, large-scale recycling and waste separation. This entails investments in the development of infrastructure and solutions to facilitate the separate collection, as well as the management and re-use of waste.

The actions envisioned to be implemented under this specific objective are expected to introduce climate-friendly, resource-efficient and economically viable waste management.

More specifically, through Specific Objective 2.6, the following indicative activities may be funded:

-Joint knowledge development and planning of circular economy solutions

-Building cross-border cooperation networks aimed at waste re-use.

-Joint knowledge development and planning of circular economy solutions and joint awareness-raising campaigns at large geographical scale for reducing waste production and promoting recycling and reuse.

-Investment in the development and testing of solutions for the separate sorting, storage and treatment of hazardous waste and bio-waste.

-Support the promotion of the use of recycled materials as raw materials compliant with the efficiency criteria, compliant with climate change adaptation.

In this context, the Interreg VI-A IPA Greece-Albania Programme 2021-2027, through the present call, will support cross-border cooperation to promote concrete solutions in the field of prevention, minimisation, sorting, reuse and recycling waste management in the programme area. The present Targeted Call concerns the Strategic Project foreseen in the Programme Document, under the title "Circular Economy Park", which aims at the development and implementation of solutions for the promotion of circular economy in the cross-border area. The proposal includes solutions that will support the separate treatment of specific categories of solid waste with the aim to support their preparation for reuse and recycling. Partners from both countries will cooperate in order to support the development of a circular economy model, based on knowledge transfer for a more effective way of waste management.
